

Pacific Healthcare opens Representative Office in Ho Chi Minh City, Vietnam

- **In line with Regional HQ drive to expand throughout Asia**
- **Strengthens presence and brand awareness in Asia's emerging economies**
- **Will tap medical tourism opportunities in the country**

Singapore, 21 July 2008 - Pacific Healthcare Holdings Ltd. (PHH or the Group or 太平保健), a leading provider of integrated, multi-disciplinary specialist healthcare services, is extending its reach into Vietnam with the opening of its representative office in Ho Chi Minh City. This will be the Company's second Representative Office in the region.

The Group's Chief Executive Officer, Dr William Chong, said, "The establishment of a Representative Office in Ho Chi Minh City underlines our long term interest in the country. We already have a significant number of Vietnamese patients who seek specialist healthcare treatments with our doctors in Singapore. A direct local presence will enable Pacific Healthcare to provide better support for these patients as well as identify business opportunities for the Group."

In April, PHH set up its Regional HQ in Singapore to serve as a base and nerve center to expand the Group's healthcare services throughout Asia. The Group also has a representative office in Jakarta, Indonesia.
